What is this product?

TYPE OF PRODUCT

The product is a sub-fund of Foord SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

OBJECTIVES

The Investment Manager aims to achieve meaningful inflation-beating US dollar returns over rolling five-year periods. The Sub-Fund is actively managed; the Investment Manager actively decides on the portfolio's asset selection, regional allocation, sector views and overall level of exposure to the market in order to take advantage of investment opportunities. The Sub-Fund is not managed in reference to a benchmark. It is a conservatively managed portfolio of global equities, warrants, exchange traded funds, UCITS and Other UCIs, interest-bearing securities and cash instruments reflecting the Investment Managers prevailing best investment view. This also includes investments in China A-Shares through the Shanghai Hong Kong Stock Connect, term deposits and money market funds. The use of benchmark in the fact sheet or marketing materials (if any) is for performance comparison only.

The investment policy emphasises the geographic spread of investments to achieve the objective. Changes in the perceived appreciation potential in asset classes, markets and currencies will result in changes to their exposure in the Sub-Fund which the Investment Manager may protect with currency transactions. Liquidity levels will be altered accordingly. Individual investments will be moderately actively managed, reflecting their relative attractions. Speculative or low quality investments will normally be avoided.

The Sub-Fund may also invest in money market Instruments and term deposits to minimise volatility, enhance the yield and capital growth of the Sub-Fund while reducing downside risks and waiting for opportunity to take advantage of market dislocation.

The investor may subscribe, convert and redeem units on each bank business day in Luxembourg.

Please refer to the Prospectus for more information about the Sustainable Finance Disclosure Regulation ("SFDR") classification of the Fund.

Income of this unit class is reinvested (accumulated).

INTENDED RETAIL INVESTORS

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The product is compatible with investors who may bear capital losses and who do not need capital guarantee. The product is compatible with clients looking for growing their capital and who wish to hold their investment over 5 years.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product for 5 years.

The risk can be significantly different if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The essential risks of the investment fund lie in the possibility of depreciation of the securities in which the fund is invested.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable proxy over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: Example investment		5 years USD 10 000		
		If you exit after 1 year	If you exit after 5 years	
Scenarios				
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does.

The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested

Investment of USD 10 000	If you exit after 1 year	If you exit after 5 years
Total costs	USD 115	USD 716
Annual cost impact (*)	1.1%	1.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.2% before costs and 5.1% after costs.
