INVESTMENT OBJECTIVE

To achieve optimum risk-adjusted total return by investing in a diversified portfolio of global equities and other qualifying securities. The fund aims to achieve a higher total rate of return than the MSCI All Country World Net Total Return Index over a full market cycle, without assuming greater risk.

SIX MONTH MARKET REVIEW

Markets started the year tepidly, but six months in, investors have put aside key risks—stubborn inflation, higher interest rates, and the potential for recession—and piled into risk assets. Much of the share gains were concentrated in a narrow range of seven mega-cap technology sector names: Amazon, Microsoft, Apple, META, Alphabet, Nvidia, and Tesla. Fewer than 30% of companies recorded gains above the market average, resulting in the narrowest market in the past 20 years. Global geopolitical risks are elevated with deteriorating US-China relations and the war in Ukraine of prime importance.

Against this backdrop, global equities (+14.3%) rallied, with developed markets (+15.4%) outperforming emerging markets (+5.0%). US, European and Japanese equities led developed market returns. Chinese equities (-5.4%) weighed on emerging markets while Brazilian equities, Indian equities, South Korean equities and Taiwanese equities posted gains. Information technology (36.9%) and communication services sectors (25.4%) advanced most, while the energy sector (-2.3%) lagged. Industrial commodities including oil declined on expectations for slowing economic growth or recession. Gold gained as uncertainty surrounded the Fed's next rate move.

The US dollar weakened against the British pound (+5.7%), euro (+2.2%), and while strengthening against the Australian dollar (-1.8%) and Japanese yen (-8.7%) as investors anticipate the peak in interest rate differentials may now be behind us.

PERFORMANCE

Performance to 30 June 2023 (In USD, net of fees and expenses)

(Periods greater than one year are annualised)

	3-month %	6-month %	1-year %	3-year %	5-year %	10-year %	Since Inception %
FGEF Class B *	-2.4	6.7	7.8	4.7	5.0	5.6	6.5

Peer group	4.5	10.8	13.6	8.4	5.5	6.5	7.7

(Benchmark: MSCI All Country World Net Total Return Index)
(Peer group: Global Large-Cap Blend Equity Morningstar category)

During the period, the fund underperformed the benchmark given its overweight position to Chinese equities, cyclically high cash positions and underweight exposure to the expensive US tech sector, which led the market rally.

PERFORMANCE (CONTINUED)

Core to Foord's investment philosophy is investing in businesses with sustainable competitive advantages, enduring franchise values, earnings sustainability, and durable business models. The global equity rally in the period has driven valuations back into the expensive territory, as markets seemingly ignore the risk of stubborn inflation, higher interest rates, and ultimately, the potential for recession. In contrast, we remain vigilant and cautious.

INVESTMENT THESIS

Foord is a fundamental earnings house that takes long-term views and patiently waits for prices to follow earnings. We do not trade on market sentiment. We are benchmark agnostic and confidently different from peers.

We construct the portfolios independently of the benchmark we are trying to beat. We may take sizable off-benchmark positions in businesses that offer asymmetric risk-reward to protect investor capital and deliver a safe investment yield. Superior stock selection through the study of deep realities of businesses is the cornerstone of portfolio construction, along with risk management through the diversification of economic factors. The portfolios span key markets and sectors based on the managers' conviction of the future earnings of the securities the Sub Funds own. In many cases, our expectations are very different from those of the market, which can lead to periods of underperformance.

We believe that minimizing the permanent loss of capital is paramount to generating superior long-term returns. Managing the risk of loss is therefore our priority. Our commitment to investment stewardship and risk management underpins all that we do. While the future direction of markets is murky, our focus on finding long-term value serves as the guiding light in our quest for outperformance.
