

FOORD INTERNATIONAL TRUST – CLASS B

The master fund aims to achieve meaningful inflation-beating US dollar returns over the long term from a conservative, but actively managed, multi-asset class portfolio of global developed and emerging market securities reflecting Foord's prevailing best investment view. The fund is appropriate for investors with a moderate risk profile, seeking preservation of capital and safe investment growth with a time horizon of at least three years.

IMPORTANT INFORMATION FOR INVESTORS

This is a marketing communication. Investors should read the prospectus available in English at www.foord.com, and seek professional advice or consider investment suitability before investing in the fund. This document is not an advertisement but is provided for information purposes and should not be regarded as an offer or solicitation to purchase, sell or otherwise deal in the fund.

Collective investment schemes in securities are generally medium to long term investments. Foord does not guarantee the capital invested or the performance of the investment. The portfolio includes qualifying investments listed on regulated exchanges outside the fund's domicile that carry risks as described in the prospectus, including the possibility of non-recoverable withholding taxes and non-repatriation of funds. Investment values and some costs may fluctuate because of factors including but not limited to currency exchange rates that can be affected by a wide range of economic factors.

Economic forecasts and predictions are based on Foord's interpretation of current factual information, and exploration of economic activity based on expectation for future growth under normal economic conditions, not dissimilar to previous cycles. ANNUALISED COST RATIO %

	12 MONTHS	36 MONTHS
TER – Basic	1.03	1.03
Transaction costs	0.05	0.05
Total cost ratio	1.08	1.08

A TER is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average value of the portfolio. Where the fund has invested significantly into an underlying fund the TER may include the TER of that underlying fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The latest audited TER is 1.03%. The quantum of transaction costs is affected by the quantum of the gross in and outflows over the period presented. A schedule of fees and charges is available on request.

UNIT PRICING AND TRANSACTIONS

Units will be issued or realised on a forward pricing basis only on Dealing Day (as defined in the prospectus) and calculated based on the net asset value ("NAV") represented by one unit. Prices are published on www.foord.com within two business days after the relevant Dealing Day. All dealing application requests must be received before 16h00 (Central European time) on each Dealing Day.
