A TER is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average value of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. The latest audited TER is 0.01%. The quantum of transaction costs is affected by the quantum of the gross in and outflows over the period presented. A schedule of fees and charges is disclosed in the prospectus or PRIIP KID, which are available on request.

### ANNUALISED COST RATIO %

	12 MONTHS	36 MONTHS
TER – Basic	1.07	1.08
– Performance	0.00	0.00
Transaction costs	0.09	0.08
Total investment charge	1.16	1.16

### PERFORMANCE FEES

Performance fees align investor and manager return objectives by rewarding the manager for outperformance. A performance fee is chargeable only when the portfolio performance exceeds the benchmark. Should the portfolio underperform it must first recover the underperformance since the performance fee last crystallised or the inception of the share class, whichever is later.

The performance fee is calculated and accrued on a daily basis. If the performance conditions are no longer satisfied, all performance fees previously accrued during that accounting period (calendar year) are reversed. Included in the TER disclosure is performance fee for outperforming the benchmark. Subject to an overall minimum, the annual fee may be increased by the performance fee, calculated as the difference between the portfolio performance and the benchmark return for the same period, multiplied by the performance fee sharing rate.
