KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore that aims to achieve optimum risk adjusted total return by investing primarily in a diversified portfolio of global equities. The Fund aims to achieve a higher total rate of return than the MSCI All Country (“AC”) World Net Total Return Index over a full market cycle without assuming greater risk.
- Class A Units, Class B, Class B1 and Class X Units are currently available. These 4 classes differ only in terms of the rate of management fee payable, performance fee payable and targeted investors. Class B Units are available for subscription to all investors. Class X Units, Class A Units and Class B1 Units are made available only to approved institutional investors who may include institutional investors as defined in the SFA.
- Currently, the Managers do not intend to make regular distribution in respect of the Units of the Fund. **The making of distributions is at the absolute discretion of the Managers and distributions are not guaranteed.** Distributions from the Fund may be made out of the income and/or capital of the Fund. Investors should also note that the declaration and/or paying of dividends or payouts (whether out of capital or otherwise) may have the effect of lowering the NAV of the Fund.
